TinkerWithMe

Wearable Tech Lab · Premium Course

2 live sessions · 2 hrs each · 9–13 yrs · from KES 7,000

Premium course outline **PREMIUM**

Overview

Kids design and build a wearable gadget they wire, code and wear home.

DETAIL	
Track	Arduino Robotics & Electronics
Format	2 live sessions · 2 hrs each
Delivery	Live online (1:1 or small group) or in person, you choose when booking
Ages	9–13 yrs
Level	Beginner → Intermediate
Price	from KES 7,000
Maker Kit	Optional, KES 8,500 one-time: Arduino Uno R3 board + USB cable, Breadboard + 40 jumper wires, LEDs (red, yellow, green, white, RGB) + resistors, Push buttons, potentiometer and piezo buzzer, Light sensor (LDR) and sound sensor, HC-SR04 ultrasonic sensor + bracket, IR sensor, DHT11 temperature & humidity sensor, PIR motion sensor, SG90 servo motor, Relay module, 16×2 LCD screen (I2C), Battery holder, Storage box. Bought once and reused in every Arduino course. Needed at home for live online sessions; for in-person sessions we provide kits, so buy one only to keep building at home.
Parts pack	Optional, KES 1,000: NeoPixel LED strip, Wristband / cap and craft materials, Portable battery pack
Standalone	Yes
Prerequisites	None — standalone

Programme

1. **Build & light up.** Sew or attach a NeoPixel LED strip to a wristband or cap, then program light patterns: rainbow cycle and heartbeat pulse.

2. **React & personalise.** Add a sound sensor so the lights react to claps and music, then finish and personalise the wearable with craft materials.

What they take home

🎁 Their custom LED wearable

Why parents love it

“Part fashion, part engineering. They design it, wire it, code it, and wear it home.”

How to book

Places are limited and run on scheduled dates. To book or ask a question, email **tinkerwithanne@gmail.com** with the course name (**Wearable Tech Lab**), your child's age, and your preferred dates. Prices start from the amount above and may vary with group size and materials.
