

Smart Plant Carer · Premium Course

Single session (2.5 hrs) · 9-13 yrs · from KES 5,000

Premium course outline **PREMIUM**

Overview

Build a self-watering planter that senses dry soil and pumps water to a real seedling all by itself.

DETAIL

Track	Arduino Robotics & Electronics
Format	Single session (2.5 hrs)
Ages	9-13 yrs
Level	Beginner → Intermediate
Price	from KES 5,000
Standalone	Yes
Prerequisites	None — standalone

Programme

1. **Sense the soil.** Wire a soil-moisture sensor and calibrate the dry vs. wet readings on the Serial Monitor.
2. **Pump on demand.** Drive a small water pump through a relay module and set a moisture threshold so it waters only when the soil is dry.
3. **Build the planter.** Assemble the pump, tubing and water reservoir around a potted seedling and run a full automatic watering cycle.

What they take home

Self-watering planter kit + a seedling

Why parents love it

"They build tech that keeps a plant alive on its own — and understand every part of why it works."

How to book

Places are limited and run on scheduled dates. To book or ask a question, email **tinkerwithanne@gmail.com** with the course name (**Smart Plant Carer**), your child's age, and your preferred dates. Prices start from the amount above and may vary with group size and materials.
