

Bluetooth Control Lab · Premium Course

2-session series (2 hrs each) · 11–15 yrs · from KES 7,000

Premium course outline **PREMIUM**

Overview

Control an Arduino gadget wirelessly from a phone over Bluetooth, then build a custom app to command it.

DETAIL

Track	Arduino Robotics & Electronics
Format	2-session series (2 hrs each)
Ages	11–15 yrs
Level	Intermediate → Advanced
Price	from KES 7,000
Kit fee	KES 2,000 for the parts your child keeps (Arduino board to keep: +KES 2,000, optional)
Standalone	No
Prerequisites	Button controlled LED (free, recommended)

Programme

1. **Connect & command.** Wire an HC-05 Bluetooth module, pair it with a phone, and send commands from a terminal app to switch LEDs and drive a motor — understanding the serial link underneath.
2. **Build your app.** Use MIT App Inventor to make a custom phone app with your own buttons, and send live sensor readings (distance or temperature) back to the phone for true two-way communication.

What they take home

Bluetooth-controlled gadget + their own phone app

Why parents love it

“Their phone becomes the remote control — they wire the hardware, build the app, and make the two talk to each other.”

How to book

Places are limited and run on scheduled dates. To book or ask a question, email **tinkerwithanne@gmail.com** with the course name (**Bluetooth Control Lab**), your child's age, and your preferred dates. Prices start from the amount above and may vary with group size and materials.
