TinkerWithMe

Musical Instrument Builder · Premium Course

2 live sessions · 2 hrs each · 8–12 yrs · from KES 7,000

Premium course outline **PREMIUM**

Overview

Build a playable electronic instrument on a breadboard.

DETAIL	
Track	Arduino Robotics & Electronics
Format	2 live sessions · 2 hrs each
Delivery	Live online (1:1 or small group) or in person, you choose when booking
Ages	8–12 yrs
Level	Beginner → Intermediate
Price	from KES 7,000
Maker Kit	Optional, KES 8,500 one-time: Arduino Uno R3 board + USB cable, Breadboard + 40 jumper wires, LEDs (red, yellow, green, white, RGB) + resistors, Push buttons, potentiometer and piezo buzzer, Light sensor (LDR) and sound sensor, HC-SR04 ultrasonic sensor + bracket, IR sensor, DHT11 temperature & humidity sensor, PIR motion sensor, SG90 servo motor, Relay module, 16×2 LCD screen (I2C), Battery holder, Storage box. Bought once and reused in every Arduino course. Needed at home for live online sessions; for in-person sessions we provide kits, so buy one only to keep building at home.
Standalone	No
Prerequisites	Buzzer melody (free, recommended)

Programme

1. **Theremin & piano.** Build an ultrasonic theremin where hand distance controls the pitch, then wire an eight-button piano mapped to a full octave.
2. **Tempo & performance.** Add tempo control with a potentiometer, record and play back a short melody, then perform it for the group.

What they take home

🎁 Their instrument circuit on a breadboard

Why parents love it

“Music + code + electronics = the coolest instrument they've ever made.”

How to book

Places are limited and run on scheduled dates. To book or ask a question, email **tinkerwithanne@gmail.com** with the course name (**Musical Instrument Builder**), your child's age, and your preferred dates. Prices start from the amount above and may vary with group size and materials.
